Residential Smoke Detector Survey

How many smoke detectors do you have installed in your home? _____

Where are they located? Check off *all* that apply:

Basement Living Room Family Room Dining Room

In some Bedrooms In all Bedrooms Hallway outside Bedrooms

Other, please explain: _____

ONLY check here if all of your smoke detectors are working and have a fresh battery

What type of smoke detectors do you have? Check *all* that apply:

Battery operated Hardwire 120volt or low voltage Hardwire with Battery Backup

Check here if you would like the Fire Department to visit your home to check your detectors and provide a FREE Home Safety Inspection.

The Collingswood Fire Department is recommending a working smoke detector on each level of the home in each bedroom. They should be mounted according to the manufacturer's recommendations. If you need assistance in locating additional smoke detectors, changing the battery, determining whether the detector is too old, or have general fire safety questions please call the Fire Department at 856-854-1043 x 0.

Smoke Detectors Are Life Protectors!!!!

Fire Officials consider smoke detectors the most effective low-cost fire protection devices you can buy. Used properly, they can double your chance of surviving an accidental house fire.
